THERMOFORMING

“WE CREATE THE OPTIMAL PACKAGING TO PROTECT AND TRANSPORT YOUR PRODUCTS!”

Are you looking for the best way to protect and transport your product? Need some innovative new concepts? We will develop the optimum custom packaging solution for you.

Our design specialists in Duiven (Holland) and Sonsbeck (Germany) will support your packaging project from concept to manufacture.

We can produce a broad range of assembly trays, transport trays and protective cushion packaging. All are designed to protect your product while minimizing the logistic handling and space requirements.

Trays are designed to suit many different product sizes, shapes and weights. Trays can also be designed to stack/nest to allow for multiple use cycles

Whatever your requirement Nedupack Thermoforming designs and manufactures the most efficient solution for you!

Please contact us for further information.

"ENGINEERING NEW PART DESIGNS CUSTOM FIT TO YOUR REQUIREMENTS IS OUR SPECIALTY"

Nedupack Thermoforming is part of the worldwide ReFlex® alliance is a group of companies operating globally that cooperate on the development and manufacture of buffer caps (Cushions).

ReFlex® Cushions are patented packaging which enable you, as manufacturer, to deliver your products undamaged to their final destination. ReFlex® Cushions are produced by thermoforming and can be used to pack all kind of products.

The benefits of ReFlex® compared with regular foam and EPS packaging:

- 100% recycled material
- 100% recyclable
- 100% reusable
- 100% RoHS compliant
- Nestable / stackable
- Saves up to 70-85% warehouse space
- Saves transport costs
- Saves packaging costs
- More environmentally friendly

Whether or not you know the size of your carton, we can design a pack that will maximize protection and the number of cushions sets we can fit on a pallet. Please contact us if we can be of further assistance.
